

Fast-Fit Range

Why Choose Fast-Fit?

The Fast-Fit Cubicle range is a cost effective cubicle system. Fast-Fit Cubicles are functional, durable and attractive; manufactured in the UK from 19mm Melamine Faced Chipboard to a high standard, they are suitable for low-mid traffic, low-moisture areas. The Cubicles come in three colour options, White, Grey and Cream.

Who are Total Cubicle Solutions?

Total Cubicle Solutions offer an extensive range of Cubicles, Wall Cladding Boards, IPS duct panels, and Vanity Units. Manufactured in the UK, our innovative products are made to the highest of standards.

Each of our Washroom Systems are crafted to precision by our in-house team allowing you confidence and assurance specifying Total Cubicles for all your Washroom needs. With over 45 years industry experience and a passion for stylish yet affordable Cubicle Solutions, our friendly staff will offer helpful advice on all our products.

Simple Order Process

There are several ways you can order Fast-Fit Cubicles...

- E-mail our sales team
- Call our sales team
- Fax your enquiry

Choose Your Layout

Fast-Fit Cubicles are designed to accommodate four standard layout options. Determine which best suits your space needs. The four options are detailed overleaf.

Choose How Many Cubicles You Require

Each Fast-Fit Cubicle is manufactured to standard dimensions of 1500 mm deep at 800 mm centres. Determine how many you require to fit your space needs.

Choose The Colours You Require

The Fast-Fit range is available in 3 colours; White, Grey and Cream. The colour of the Doors, Pilasters and Partitions can be specified individually to provide contrasting colour options, i.e. White partitions / Grey doors.

Express Delivery

Our speedy delivery service ensures that your Cubicles are delivered promptly. Where possible we will endeavour to dispatch your items within 48 hours nationwide.

If you prefer, you can also collect your items direct from our Warehouse.

Standard Layout Options

C/L Corner Layout

B/W Between Walls

Typical Front Elevation

F/S Free Standing

S/I Single In-Line Partition

Typical Side Elevation

ALL DIMENSIONS ARE QUOTED IN MILLIMETERS

Optional Extras

Additional Components

To increase the flexibility of the Fast-Fit range we offer a number of alternative sized components, allowing you to create alternative which are not satisfied by our standard dimensions.

- 200mm optional Pilaster
- 300mm optional Pilaster
- Partitions available at 1800mm deep x 900mm

Cutting the Components

Our components can be cut to size on-site using suitable carpentry tools to achieve desired sizes.

For instance, should you require partitions at a depth of 1700mm, you can achieve this by purchasing an 1800mm deep partition and trimming 100mm before assembling the cubicles. Placing the Satin Anodised Aluminium trims supplied over the cut edges maintains a clean finish.

If you require any further information regarding our Optional Extras please do not hesitate to contact our technical department.

Optional Extras

Accommodating Bigger Rooms

Our additional components can be configured with all of our layout options:

- Corner Layout
- Between Walls
- Free Standing
- Single In-Line Partition

Any combination of additional extras can be used to achieve your bespoke layout.

Fast-Fit Cubicle - Assembly Instructions

1

Set the Channel Brackets 135mm off the finished floor level, fixing at the locations shown.

2

Slot End Pilasters and Partition Panels into the Channel Brackets and fix in positions as shown below.

3

Fix legs to the partitions and clip H-Section Brackets to the top of the Partition Panels as shown below. The H-Sections can be screwed into the top of the Partition Panels for extra strength and security.

Please note: We no longer pre-drill the partitions as Soil Stacks, and Window positions can compromise the fitting position. Normally our Cubicles are divided equally along the wallspace except where Ambulant or Disabled Cubicles are to be implemented. Channel Brackets are provided at standard lengths and may need cutting to size. These instructions show a typical Twin Open End cubicle arrangement, your specific layout may differ but the principals remain the same.

Fast-Fit Cubicle - Assembly Instructions

4

Fix Channel brackets to the rear of Pilasters as shown below.

Channel brackets to be located centrally for pilasters between adjoining cubicles.

Channel brackets to be located on the edge of pilasters for the last cubicle in an open-end situation.

5

Fix second Partition Panel into the H-section as shown below. Offer up Pilasters to the end of the Partition Panels.

6

Fix Head Rail into top of Pilasters and x through Channel Brackets on the Pilasters to Secure in place.

Fast-Fit Cubicle - Assembly Instructions

7

Fix Door fittings as shown below.
